

WebCDL® permits sponsors to view all physiological and laboratory data captured using ClinDataLink™ including spirometry, spirometry challenge, electrocardiogram, pulse oximetry, blood pressure, height, weight, and point-of-care laboratory data, and more.

WebCDL®:

- Generates and imports queries electronically into ClinDataLink® to eliminate paper and transcription of data
- Permits paperless queries
- Uses one application for multiple protocols
- Allows investigators to review and sign data online
- Permits online data management
- Increases remote monitoring capabilities
- Is compliant with 21 CFR Part 11 requirements for electronic records
