FOR IMMEDIATE RELEASE

CompleWare Launches Newest Version of CompleClinical® with Integrated Interactive Web Response System (IWRS) Functionality

NORTH LIBERTY, IA (March 2, 2015) – CompleWare announces launch of the latest version of CompleClinical, its comprehensive eClinical solution for clinical trial data capture and management. With the inclusion of integrated RandomizeIT®, CompleClinical Version 1.5.0 now offers unsurpassed interactive web response system (IWRS) and supply chain management features.

“The release of CompleClinical with integrated RandomizeIT allows users to perform all IWRS and other clinical trial functions within a single application,” said Dr. John M. Weiler, CompleWare’s President. “This represents an important milestone for the industry’s ability to manage clinical trials.”

Key features of CompleClinical with integrated RandomizeIT:

- provides IWRS features allowing clinical sites to randomize subjects from within the electronic case report form (eCRF) application with the click of a button
- offers supply chain management features to track and manage clinical supplies across sites, drug packaging and distribution vendors, sponsors, and clinical research organizations (CROs)
- is fully-integrated with CompleClinical allowing easy navigation within the eCRF for all IWRS functionalities

About CompleClinical

CompleClinical is designed for seamless implementation, practical use and straightforward control. Configuration can be completed in a week or two. From capturing and validating, to sorting and reporting, CompleClinical software ensures global site data are accurate, secure, and available on-demand through a single point of access, anywhere in the world.

CompleClinical provides a cloud-based platform to reduce the time, cost, and risks involved in managing:

- eCRF data
- Electronic patient reported outcomes (ePRO)
- Physiological device data (such as spirometry and electrocardiograms)
- Laboratory data and radiological images
- Clinical Trial Management System (CTMS) functionality
